Alert Windows - While you have Velocicast open, no matter what lane you are viewing, if one or more items that you have indicated interest in come across the block of any lane, you will be alerted. Whether it is an item that you are **Repping**, have on your **Watchlist**, or have a **Prebid/Maxbid** on, you will receive one of three alerts.

Alert Windows - When the clerk moves to an item you have previously indicated interested in, an alert will appear in the bottom left of your screen with the most recent on top. Click on the “**View item**” button to open/move to the lane where that item is running. The lane will appear as the first lane on your screen. If no action is needed click on the “X” to close the alert. If no action is taken within 30 seconds, the alert will disappear.

All alerts will have the following information; **Alert Type**, **Lane**, **Auction**, **Run #**, **Item Description**, and **Any Notes that you previously added**.

The **Prebid/Maxbid** alert will also indicate the amount of your bid.

Bidding - Keep tabs on the bid status of the current item and place bids in real-time. Options for bidding include standard bids (next highest increment), max bids (choose the max you will pay and Velocicast will bid for you 'ebay style'), and hard bids (intimidate other bidders by causing the bid to jump to a higher amount).
